GOVERNANCE

SLA Estimation on Recommendation Platform

By means of the decision support system for SLA's;
•Resource management & bottleneck identification
•KPI determination & possible loss prevention
•Risk & sustainable KPI management

AI Based Corporate Data Maturity Platform

As a result of data maturity platform;
• Current situation detection
• Action plan
• Maturity level at different time periods

Reporting Platform

With the cloud-based platform;
• User authorization and management
Reports at different levels are
presented to the end user.
All configurations are made on
a single platform
If the structure to be watched is
mobile compatible,
it is supported.

Safe Supply Chain

With the blockchain technology-based product in SCM;
• Structural and human-induced errors in produt,
information and money flow
• Sustainable traceability and transparency
• A secure structure with strict standards and regulations

RGSoft Platform

Through offered web-based application;
• Two-dimensional designs of industrial
products regardless of the brand
• Carbon footprint measurement and the management
of sustainability
• Monitoring and management of the production process

What our customers say about us? : **KeepnetLabs**

Experilabs saved us 8 months in 2022!

 In 2022, when we focused on growth, we shared our technological development process and goals with Experilabs. The "Managed Service" model they presented to us attracted our attention. For our two new modules that we want to add to our SaaS product, we have decided to move forward with this model, in which they managed the software development and human resources processes, while we could focus completely on business goals in isolation from extra stressful processes such as turn-overs in the sector. During the process, the maximum cooperation of the Experilabs team with our corporate culture and corporate policies made us feel safe.

   As a result, we achieved to save 8 months with the managed service model in 2022 which was quite significant and we also recorded 200% growth during the year. I would like to thank the "Experilabs Managed Service" team,who helped us to achieve our goal in this process.
